Responding to Reading Comprehension Questions
~Expert Answer Checklist~

☐ Restate the question in the first line so it is evident what question you are answering.

☐ State at least 3 points to support your answer. You need to provide proof that your answer is correct.

☐ Be descriptive and fully explain your ideas. Do not just assume that your reader understands what you mean.

☐ Refer to the text you are analysing. State direct quotes, use specific words from the text, and/or refer to the ideas presented in the text.

☐ Make connections to the text in regards to the question you are answering. State your thoughts, feeling, and opinions. How does it relate to yourself, other texts, and/or the world? Go beyond the text itself.

☐ Proofread your answers for capitals, spelling, and punctuation. Reread your answers to make sure they make sense. Use this checklist to make sure you covered everything.
